Version: 1.53 Platform: Windows 10 / 8 / 7 Release Date: 2016-11-14 File Size: 31.7 MB 30 days trial 15 times export limitation  
A: Click the bottom-left corner of the window in iClone. Then, click Tools -> About. Underneath it will be a "Description" line. Copy this line to the clipboard (Ctrl+C). Then, in the command-line, open a new terminal window and go to your iClone folder. Paste this line (Ctrl+V). C:\Users\Your\_Name\Documents\iClone>iClone.exe It will start iClone, and it should tell you the Indigo Render Plugin is the current version. If it is, press "OK". If it isn't, choose the "next" button until you are in the "Welcome" screen. Then, use the "Select" button to choose "Indigo", and press "Next". Q: How to get the right values of user in the login form (logout is using the same form)? I have to login form and there I have a username and a password, after the login the user has to be redirected to the menu page but in the menu page I have to show a message that the user is successfully logged in. Here's my Login: How to get the right 2d92ce491b
