Windows 7 (Longhorn) Windows 7 (Longhorn) has been launched on July 29, 2009 in New York and was released worldwide on October 22, 2009. It was the successor of Windows Vista and is Microsoft's first operating system which was exclusively designed for the consumer desktop market. It is designed to compete with Apple's OS X Snow Leopard. Although not released to the general public, Windows 7 was publicly unveiled in May 2008 at the D10 computer conference in Las Vegas. With some minor changes, the final version was leaked to the public around July, 2009. Microsoft stated that Windows 7 would be released at the end of 2009. The final public release was on October 22, 2009. According to David Hsieh, program manager for Windows Client and Communications Group, Windows 7 will be the first operating system to support simultaneous voice and video calling, with support for standard SIP video applications being added as well. Windows 7 is supported on the x86, x64 and Itanium versions of Microsoft Windows. Release date Due to delays in releasing Windows 7, Microsoft originally set a "Windows 7 launch date" of May 21, 2009, which would have been the fifth anniversary of Windows Vista's release. However, on May 14, 2009, Microsoft stated that it had delayed Windows 7 to late 2009, citing that users needed to test Windows Vista Service Pack 1 (SP1) and also Windows Server 2008 Service Pack 1 (SP1) to "make sure that everything is working and they are ready for deployment." The release date of Windows 7 was also pushed back multiple times. At the RSA Conference 2009 in San Francisco, Microsoft announced that the "Windows 7 launch date" would be delayed until July 29, 2009. On October 23, 2009, it was announced that Windows 7 would be delayed until October 22, 2009. The delay was due to Microsoft's need to make adjustments to Windows 7 based on feedback received from its beta and evaluation versions, and allow for the development of and testing for Windows 7 updates. Microsoft acknowledged that the delay meant that it would miss the holiday season, which had been a high point for software sales. 2d92ce491b
