Bomb Sniffing Dogs Great Again The Federal Aviation Administration uses dogs to sniff out explosives, but is it the best way? In April 2007, the Transportation Security Administration released a videotape showing a man, obviously high, wandering around the airport as several dogs sniffed his luggage. An unidentified TSA agent explained that the dogs had found a bomb. The incident was a serious embarrassment for the agency. Airplanes, after all, are a national security issue. But the agency's real problem wasn't the man with the bottle, or the whacky lawyer hired by his family to sue the agency. The real issue is the dogs, or rather the "behavior detection" dogs, as the TSA prefers to call them. It turns out that the TSA has spent tens of millions of dollars on the dogs and trainers that sniff at every passenger's luggage, and they have proven to be remarkably unreliable. According to a recently completed GAO report [pdf], the TSA spent \$40 million on the dogs in 2005, up from \$
