Homework Solutions 1. Our business needs to consider whether the asset is used in the. The first step is to determine the current and forecast value of a lease on the same. In this case, the derivative \$1,200,000 is carried at fair value. A. ACCOUNTING PRINCIPLES 34. 9. The following is an excerpt from the textbook: ACCOUNTING PRINCIPLES AND INCOME TAXATION 13 Business Aspects of Accounting of financial accounting : activities, objectives, and principles. - Page:Q: How to use an NSPredicate for a predicate about toMany relationships? I have 3 entities connected by toMany relationships. I have a query that takes an Entity X and looks for all entities Y that are a parent of X. This is not a one to one relationship, so there are many instances of X which have a one-to-many relationship with Y. So, here's what I want to do: I have an instance of X, and I want to find all the children of X. Here's the NSPredicate I used to retrieve the children of X: NSPredicate \*predicate = [NSPredicate predicateWithFormat:@"ANY children.parent = %@", self.parent]; How can I change this to give me all the children of X? Thanks in advance! A: You can do this by using the IN keyword. Just check what the docs say: in operator Returns an array of objects matching the given expression. Example: [NSPredicate predicateWithFormat:@"(parent = %@) AND (children IN %@)", self.parent, parentArray]; Related Videos "The blue spandex is a medium size. It will look good on top of a skinny/slim body. It is a little tighter in the thigh. It is a knee length, and the length is good for you. It is a little tight in the hip area. " "This is a size 12. I love this legging! It's so easy to wear. I wore it in the park this weekend and really enjoyed it. I also wore it on our shoot and was comfortable. It's a great stretch fabric. I wish it had pockets though. It's great on a day when you want something comfortable and warm,
