
Signing Naturally Unit 2 Homework Answers

View Homework Help - ASL Unit 2.docx
from ASL Unit 1.Q: Can an embedded
google maps uses c++ and not java? Can an
embedded google map uses c++ and not
java? I've been searching google but I didn't
find any reference to it. A: The API is all
open source. It's not limited to any particular
language. Use the API docs to see how to
implement it. From the doc for API key

authentication: Create an API key for your application. Call the Maps API Hosting API and set the "Authorized Javascript Origins" parameter to "*" (The parameter name is "maps-api-key". Also see here for some more info. Q: what is the best way to create json objects from java object I have one java object, say for example

com.example.Employee. I want to create a json like as follows. { "name" : "John", "age" : 20, "designation" : "manager", "skills" : ["java", "Spring", "JavaBeans"] } I am able to create this object as follows public class Employee { private String name; private int

```
age; private String designation; private String
    skills; public String getName() { return
name; } public void setName(String name) {
    this.name = name; } public int getAge() {
return age; } public void setAge(int age) {
    this.age = age; } public String
    getDesignation() { return designation; }
    public void setDesignation(String
designation) { this.designation = designation;
```
