namespace Symfony\Component\Rout  
ing\Matcher\Dumper; use

---

```
Symfony\Component\Routing\Route;
/** * DumperInterface is the interface
all MatcherDumper implementations
must implement. * * @author Fabien
Potencier */ interface
DumperInterface { /** * @return
string The dumped route */ public
function dump(); /** * @return array
An array of parameters to be passed to
the Route */ public function
getParams(); /** * @return array The
options for this dump */ public
function getOptions(); } Q: How to
extract words only from a string in
java? String a = "This is test written by
Stas, Help us to study"; Now I want to
```

---

extract the words "This", "is", "written" from the above string only. I tried to use the split method, but not getting the required result. A: You can use StringTokenizer

```
String a = "This is test written by Stas, Help us to study";
StringTokenizer st = new
StringTokenizer(a);
while(st.hasMoreTokens())
System.out.println(st.nextToken());
```

A: There's also the following:

```
String[]
words = a.split(" ");
for (String word :
words) { System.out.println(word); }
```

I find this method more intuitive. from the problems that led to the crash. We were having trouble telling passengers
